Snowflake

Snowflake is a cloud-based data platform used to store, process, analyze, and manage large amounts of data.

Project structure looks like this:

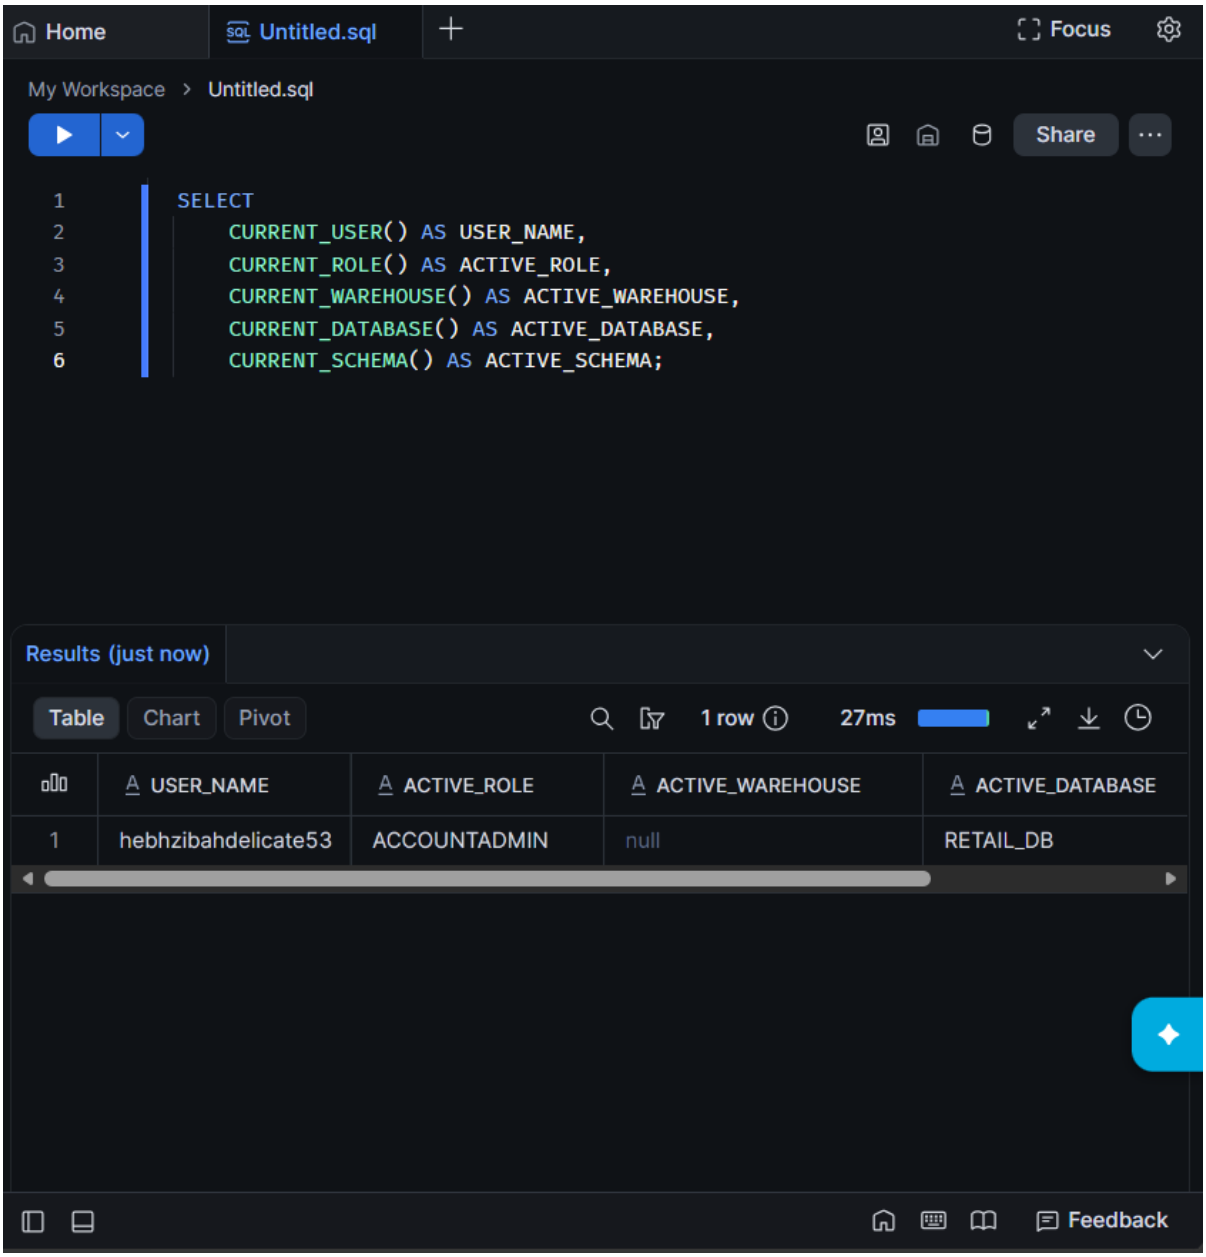

RETAIL_DB

- RAW (Schema)
  - SALES (Table)
  - RETAIL_CSV_FORMAT (File Format)
  - RETAIL_STAGE (Stage)

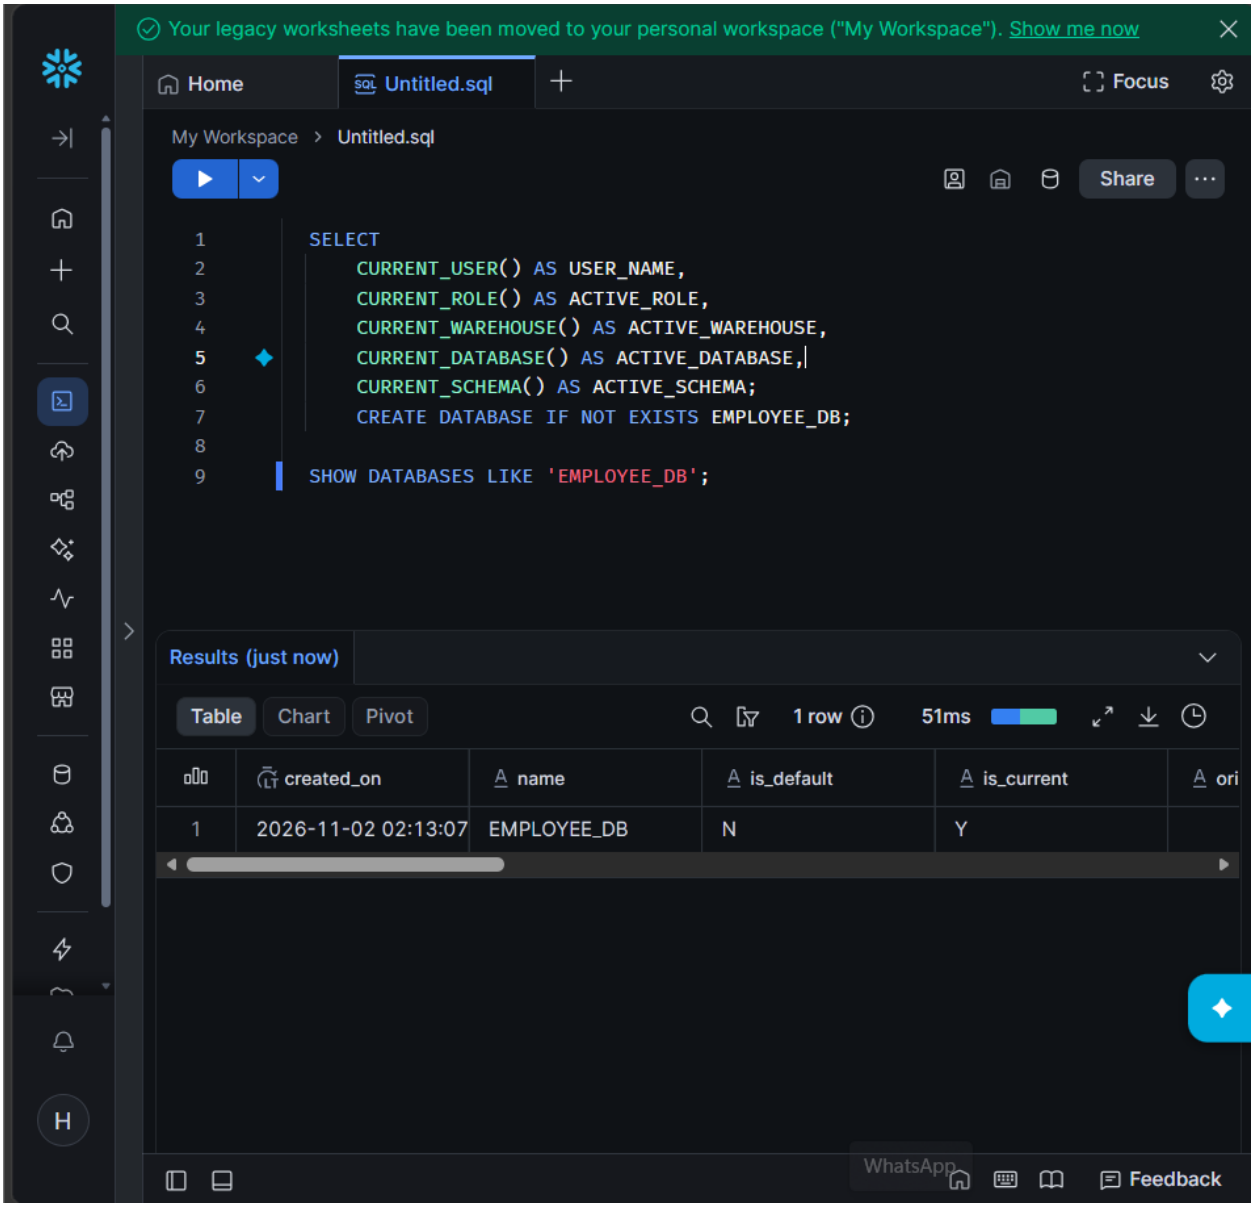

RETAIL_WH (Warehouse)

Warehouse: Provides computing resources to execute queries. It is not where your data is stored.

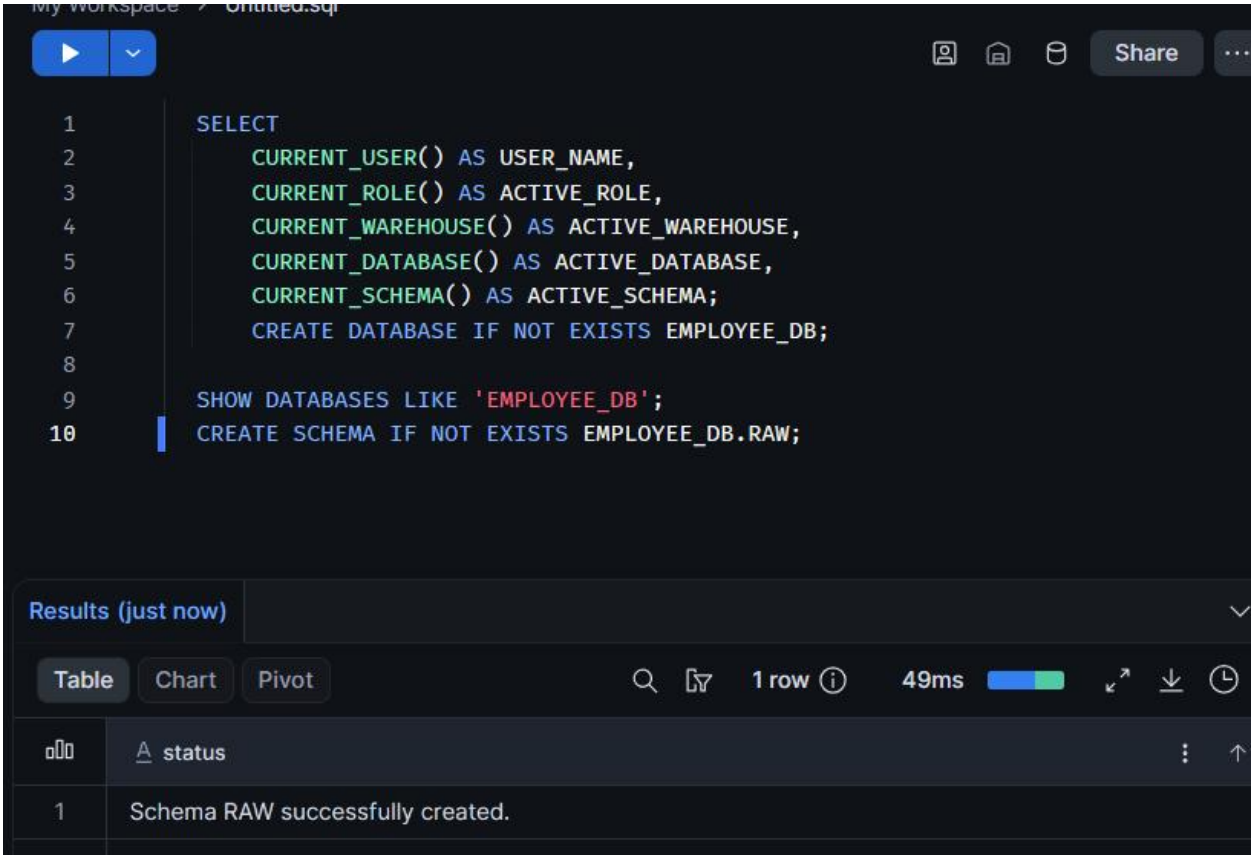

Stage: A location from which Snowflake can access files before loading them into tables.
